

# QANTAS GROUP COVID-19 VACCINATION EMPLOYEE SURVEY RESULTS

Almost  
**12,000**  
responses to the survey

One of the biggest  
single surveys on this  
topic in Australia

## 89%

of respondents have  
had at least one  
vaccine dose or  
plan to be vaccinated

## 77%

have had at least  
one dose of the vaccine

## 60%

are fully  
vaccinated

## 12%

are booked or  
planning to book

## 7%

are undecided,  
or prefer not to say

## 4%

are unwilling  
or unable to  
get the vaccine

Around **three out of four** say it should be  
a requirement for all employees to be  
vaccinated and they would be concerned if  
their fellow employees were not vaccinated.

“It’s clear that vaccinations are the only way to end the cycle of lockdowns and border closures and for a lot of Qantas and Jetstar employees that means getting back to work again. This was the one of the largest responses to any survey we’ve conducted, even with thousands of our people stood down, which shows just how important this is for them.”

– Alan Joyce
