

# Qantas Frequent Flyer Green tier

Qantas will be the first airline in the world to reward frequent flyers for being sustainable in the air and on the ground.

## Achieving Green tier

Complete actions in 5 out of 6 categories

### Offset Flying

Offset a flight booked on Qantas.com  
Contribute to sustainable aviation fuel

### Sustainable Travel

Stay in a eco hotel

### Sustainable Lifestyle

Offset your Home and Car  
Purchase solar panels

### Choose Sustainable

Purchase wine from an eco vineyard  
Offset Qantas Wine or Qantas Store delivery

### Reduce Your Impact

Take our impact quiz to learn how

### Give Back

Contribute to a sustainability organisation  
or project

## Green tier rewards and recognition

### Choose Your Reward

On attainment of Green tier choice of:

Bonus Qantas Points

Status Credits

Qantas purchases carbon offset or  
sustainable aviation fuel on your behalf

### Bonus Qantas Points

Earned when:

Purchase eligible sustainable  
products or experiences

### Exclusive Events

Invites to special events such as:

Sustainability events and experiences

### Digital Recognition

Including:

Unique digital card

Visual recognition in My Account  
and in the Qantas app

**2/3**

of frequent flyers want to be more aware of their impact on the environment  
and would like support in their efforts to be more sustainable.

# Frequent Flyers can start working toward Green tier today:

## Offset Home and Car

- Choose your state.
- Identify how many people live in your household.
- Confirm how many vehicles you have.
- Use Qantas Points to offset, or choose to pay with cash and earn 10 Qantas Points per \$1 spent on the offset.

The average annual cost to offset home energy doesn't cost a lot, but can make a big impact

# of people in household	# of Cars	Annual cost (\$)	Annual cost (Points)
1	0	\$50	6,300 Pts
1	1	\$100	12,000 Pts
2	1	\$120	15,500 Pts
2	2	\$170	21,200 Pts
4	2	\$200	26,000 Pts

If just 100,000 frequent flyers offset their home and car emissions for a year, more than 1 million tonnes of carbon could be removed – the same amount that would be saved from installing 170,000 rooftop solar panels.

## Fly Carbon Neutral

**11%** of customers on qantas.com offset their carbon emissions from flying.

Qantas matches customer contributions dollar for dollar.

Offsetting a domestic flight can be as little as one dollar

Route	Cost (one way)
Sydney – Melbourne	\$1.00
Sydney – Perth	\$4.50
Sydney – Singapore	\$6.50
Melbourne – Los Angeles	\$17.00
Sydney – London	\$23.00

In the last two years, together with our customers, the Fly Carbon Neutral program has offset in excess of half a million tonnes of CO<sub>2</sub> – the equivalent of taking over 200,000 cars off the road.

## Protect the Reef

Members who make a contribution to help protect the Great Barrier Reef or install solar will also see these actions go towards attaining Green tier status.

## Install Solar

## Qantas Group

We're committed to minimising our impact on the environment and continuing to lead the way on sustainable aviation through emissions and waste reduction initiatives.

Zero net emissions by 2050.

Investing in next generation and low emission aircraft which reduce fuel burn, alongside smarter flight planning to reduce emissions.

Pathway to interim 2030 targets underway.

We have been operating one of the largest carbon offsetting programs in the global aviation industry for more than a decade now.

\$50 million to be invested to help with the development of a local sustainable aviation fuel.

In 2019, we announced a commitment to reducing 75% of Qantas Group onshore waste to landfill by the end of 2021, as well as the removal of 100 million single use plastic items. We were on track but COVID-19 health and safety requirements meant we had to pause some initiatives temporarily.
